SUMMARY

Computer Science student with hands-on experience in software development, full-stack web applications, and algorithmic problem-solving. Proficient in C++, C, JavaScript, and TypeScript, with experience developing interactive applications. Demonstrates technical leadership and academic excellence, including receiving a $94,000 Scholarship.

SKILLS

Languages C++, Python, C#, C, JavaScript, TypeScript, HTML, CSS, Kotlin
Framework NodeJS, React, NextJS, OpenGL, Android Studio, Jet Pack Compose, Tailwind CSS
Languages Spanish (Native), English (Fluent)

EXPERIENCE

President **Apr 2026 - Present**
Drone Club at Full Sail University, Winter Park, Fl
- Led the club's establishment and growth to 140+ members by collaboratively developing its organizational structure and operating procedures through continuous improvement.
- Planned and hosted an educational and networking event in partnership with USNDA and industry professionals, connecting 30+ students from multiple colleges with the drone industry.

President, Vice President **Jun 2025 - Aug 2026**
Latin Club at Full Sail University, Winter Park, Fl
- Led community-building initiatives and coordinated 10+ events, ranging from cultural festivals to social gatherings.

Programming Contestant **Feb 2019 - Oct 2024**
Havana, Cuba
- Competed in the Cuban Olympiad of Informatics in high school using C++, developing problem-solving skills.
- Competed in the International Collegiate Programming Contest (ICPC) at the college level, advancing to the Caribbean Finals through teamwork and dedicated training.

PROJECTS

FPV Drone Simulator
- Developed an FPV drone simulator using Unity and C# that allows pilots to get training without damaging physical drones.
- Adapted Betaflight PID control and RC rate algorithms to a flight controller to produce realistic FPV flight behavior.
- Created a quadrotor physics model using Unity's Physics API to simulate drone movement and collision response.
- Designed training scenarios based on real FPV experience to guide beginners through progressive skill development.

Drone Club One
- Designed and developed the Drone Club website using Next.js and Supabase to organize and host drone racing events.
- Integrated a PostgreSQL database through Supabase to persist race results and historical leaderboards.
- Deployed the website on Vercel to make it publicly accessible online.

HuLK Compiler
- Engineered a compiler for the HuLK programming language in Python as the final project for a compiler design course.
- Designed an LR(1) grammar, resolving syntactic ambiguities and defining operator precedence to ensure correct parsing.
- Implemented AST visitors for semantic checking, type collection, and type building to validate programs correctness.

Moogle (Information Retrieval System)
- Developer a search engine in C# and .NET using the Vector Space Model to retrieve and rank documents by relevance.
- Implemented TF-IDF weighting and cosine similarity to calculate document relevance scores based on search queries.
- Incorporated a web interface using Razor, HTML and CSS to improve the user experience.
- Earned Full Sail University's $94,000 Emerging Technologies Scholarship for technical innovation.

Epub Reader
- Developed an EPUB reader mobile app using Kotlin and Android Studio as a midterm project at Full Sail University.
- Integrated Google search and DeepL translation APIs to provide in-app research and translation without interrupting the reading experience.

EDUCATION

Bachelor of Science in Computer Science (B.S.) **Jan 2025 - Nov 2026**
Full Sail University, Winter Park, FL, USA
GPA: 4.0/4.0

Bachelor of Science in Computer Science (B.S.) **May 2022 - Dec 2024**
University of Havana,Havana, Cuba
Completed 3 out of 4 years. Performed as an Undergraduate Teaching Assistant for Data Structures and Algorithms, and Programming
